basecal[®]
200

Description

A food for special medical purposes.

Basecal is a powdered protein free feed, containing carbohydrate, fat, vitamins, minerals, trace elements and the long chain polyunsaturated fatty acids (LCPs); Arachidonic acid (AA) and Docosahexaenoic acid (DHA).

Indications

Basecal is for use in the dietary management of inborn errors of protein metabolism requiring a low protein diet from 3 years of age.

Each 21.5g sachet of Basecal100 provides 100kcal.

Each 43g sachet of Basecal200 provides 200kcal.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

For the standard dilution of 1kcal/ml:

Empty the contents of the sachet into the beaker.

Add cold water:
For Basecal100 fill to a final volume of 100ml.
For Basecal200 fill to a final volume of 200ml.

Replace lid and shake well for 10 seconds.

Basecal is now ready to use.

For best results, Basecal should be freshly prepared and where possible used immediately. Any unused Basecal should be refrigerated. Discard any remaining product 24 hours after preparation.

Tube Feeding

Basecal can be used as part of a modular feed. Use as directed by your clinician or dietitian.

IMPORTANT NOTICE

Must only be given to patients with proven inborn errors of protein metabolism under strict medical supervision.

Suitable from 3 years of age.

Not for use as a sole source of nutrition.

For enteral use only.
